Re: Freedom of Information Act Request – Interim Response #9
Tracking Number: 15-FOI-00021

Dear Mr. Hasbrouck:

We are further responding to your October 29, 2014 request for information made under the Freedom of Information Act (FOIA), which was received via e-mail by Amtrak’s FOIA Office on the same date.

Your request seeks the records described below:

(1) Any records of policies, procedures, technical specifications, contracts (including agency appointment agreements), or directives to staff, contractors, or agents pertaining to transfers of data about Amtrak passengers or customers to the Department of Homeland Security (DHS), any DHS component including US Customs and Border Protection (USCBP), the Canadian Border Services Agency (CBSA), any other Canadian government agency, or any other foreign government, or the subsequent handling or use of such data, including without limitation Advanced Passenger Information (API) and any personally identifiable data obtained or derived from the ARROW reservation system.

(2) Any records pertaining to the legal basis for such data transfers, including any e-mail messages pertaining to this subject within or between Amtrak, Amtrak agents, Amtrak contractors, and any third party or parties.

(3) Any records of policies, procedures, technical specifications, contracts (including agency appointment agreements), or directives to staff, contractors, or agents (including without limitation travel agencies and agents authorized to sell Amtrak tickets, and other ARROW users) regarding disclosures to be made concerning transfers of data about Amtrak passengers or customers to government agencies including DHS.

(4) Any records of policies, procedures, reports, or directives to staff, contractors, or agents (including without limitation travel agencies and agents authorized to sell Amtrak tickets, and other ARROW users) regarding compliance with the Personal Information Protection and Electronic Documents Act (PIPEDA) of Canada, including handling of requests for records or other requests or complaints made pursuant to PIPEDA and any disclosures to be made to passengers or customers.

(5) Any e-mail messages within or between Amtrak and Amtrak agents, Amtrak contractors, and any third party or parties containing any of the text strings "Personal Information Protection and Electronic Documents Act", "PIPEDA", or "Privacy Commissioner of Canada".
(6) Any electronic file in which any of the above records are included.

(7) All metadata pertaining to any such file, such as file system information indicating the creation data, modification date, etc.

We are continuing to review and process records responsive to your request. We are releasing in part the attached records.

The names and personal identifying information of Amtrak employees and private individuals have been redacted from the enclosed records pursuant to exemption 6 of the FOIA on the basis that disclosure would constitute a clearly unwarranted invasion of the personal privacy of these individuals. In weighing the public interest, it was determined that there was no public interest in disclosing this information.

Please note, the records we are providing are part of a huge text file (800 pages), which we are reviewing in parts. Due to the size of the file, the last page may contain an incomplete e-mail. Please be advised, the next response will pick up from where we left off.

If you have any questions regarding the processing of your request, please feel free to contact me at Hawkins@amtrak.com or at (202) 906-3741. For further assistance and to discuss any aspect of your request you may also contact our FOIA Public Liaison at FoiaPublicLiaison@amtrak.com. Additionally, you may contact the Office of Government Information (OGIS), National Archives and Records Administration, Room 2510, 8601 Adelphi Road, College Park, MD 20740-6001, e-mail at ogis@nara.gov, telephone at 202-741-5770; toll free at 1-877-684-6448; or fax 202-741-5769.

Pursuant to Amtrak’s FOIA regulations (49 CFR 701.10), if you do not agree with Amtrak’s decision to withhold the above-referenced information, you may file an appeal with Eleanor D. Acheson, Executive Vice President, Chief Legal Officer, General Counsel and Corporate Secretary, within ninety days (90) of the date of this letter, specifying the relevant facts and the basis for your appeal. Your appeal may be mailed to Ms. Acheson’s attention: National Railroad Passenger Corporation, Law Department, 1 Massachusetts Avenue, NW, Washington, DC 20001. The President and CEO of Amtrak have delegated authority to the General Counsel and Corporate Secretary for the rules and compliance to the FOIA.

We are continually working through our backlog of requests. The next response will be sent out in approximately 12 weeks.

Sincerely,

Sharron Hawkins
Lead FOIA Specialist

So are we supposed to be sending you the original Cross border OSI and this new OSI format? Thanks

RE: APIS test PNRs

Hi

(Belated) Congrats! Best wishes for both of you!

There are some problems in the format you are sending to us:
1- The nationality is in a different location (See second 'US' in examples below).
2- The number in party is missing (The "1" in 

You are sending:

OSI2VDOC6HK2/BC/US/9888777/12JUL2007/M/12JUL1948/US

We expect:

OSI2VDOC6HK2/BC/US/9888777/US/12JUL2007/M/12JUL1948

Are those items manually entered (typed as they are shown in your PNR) or automatically created by an agent entry?

Do you use this type of OSI with anyone else (e.g. airline) and if so what is the format you use with them?

Thanks

Hi [Name]

I just noted your new e-mail address. Are congratulations in order?

For some reason it just took date of births but not the rest. Can you please send me a copy of how those PNRS look in Worldspan? I want to see how the DOCS item shows in there.

Thanks

Hello [Name]

Here are a couple of test for APIS. Can you verify if everything looks ok on your side? I also have a question, with the new OSI format that we need to add will this be in addition to the current Cross Border OSI that we use today? When I was creating these two PNRS it required the old format as well. Thanks

It looks like four places Amtrak goes to in Canada: Montreal, Toronto, Aldershot and Vancouver.

So right now it looks like we need to watch for those stations for crossing the boarder.
Border Crossing.txt

Please find out if someone in Canada was going from a Montreal to Toronto for example, do they need the OSI since they cross over the US but not staying in the US. There could be a nonstop train which of course wouldn't be crossing the borderer but if they have to change trains, does that need the OSI.

Also, can we get an update of all Amtrak station codes and names that are available in Worldspan so we can update the drop-down box.

Thanks

We are currently working on the update of the existing standard Amtrak script, which is being used by our customers in order to sell a seat. We want to put into the script the piece of functionality through which a Worldspan travel agent will be able to put the APIS OSI format. Could you please advise on the question below, which has been asked by our team working on the script. We need to get a precise answer which will help to build the OSI format in the script.

I am awaiting from you an update of all Amtrak station codes and names that are available in Worldspan.

Thank you.
Just to clarify... it looks like Amtrak from their maps does not have any trains that go from a Canadian city to another Canadian city without going to the US first. Is that correct? So any time one of the four Canadian cities are used... we will always have to add the OSI. So the key is, only those four cities require the OSI no matter what.

Hi,

Please see below the answer to your questions. I am awaiting the Amtrak station codes, once I receive it from Amtrak, will forward it to you.
If the train crosses the border, the OSI is required. If it doesn't then no OSI.

Did you need help getting a city list?

Border Crossing.txt

Hi

We follow AIRIMP Rules. If there is only 1 adult passenger in the PNR then we will not send name association as by default it is associated to the adult passenger. In the case of infants, the SSRs will be associated to the adult passenger and again, if there is only 1 passenger occupying space in the PNR, then we do not send name association.

 Subject: RE: Amtrak 2-character name requirements - question

I believe we always use KK1

For the SSROTHS response what status code will AMTRAK use with this message?

e.g. 2.SSROTHS1PUC1 INVALID PSGR NAME,INPUT FULL/FIRST NAME
I would call it a new warning message, rather than error - and we change these, as they just come in standard SSR OTHS elements in the TTY path.

Re: Amtrak 2-character name requirements - question

Hi,

Please let me know if I have the information for the 2-character name requirements correct.
The following is my understanding of the change and what will happen:

AMTRAK is making a change within the AMTRAK system which will require a minimum of two characters for a passenger's first name in an AMTRAK PNR. When creating the passenger name field in the PNR, the Worldspan agent should ensure the passenger's first name is a minimum of two characters in length. e.g. -[b](6) or-[b](6)

If the first name does not contain a minimum of two characters AMTRAK will return an AMTRAK error 'INVALID PSGR NAME, INPUT FULL/FIRST NAME' in the SSR OTHS field. AMTRAK will send this error at the time the agent adds a name with less than two characters for the Passenger's first name. This will be sent either during the initial PNR creation or for during a name change entry.

The Worldspan agent will be required to make the necessary changes to ensure a minimum of two characters for the first name else the agent will be unable to issue a ticket for their AMTRAK PNR.

New Error Responses
May be returned during initial building of the Name field in the PNR, during a Name Change request, or when Ticketing of the AMTRAK PNRS

INVALID PSGR NAME, INPUT FULL/FIRST NAME = A minimum of two characters is required for the Passenger's first name.

Thanks for your help.
Best regards,

Hello

The error message will be "INVALID PSGR NAME, INPUT FULL/First NAME" and will be sent in an SSR OTHS.

It will be sent at time of adding an invalid name, either at initial creation or name change.

Hope this is what you needed.

[b](6)

I've had at least 3 calls today where Sabre border crossing PNRs will not merge into Sabre for ticketing unless the PID information was entered. These were PNRs that the agency built themselves and that no one from Amtrak had touched yet. It gave the agent an Amtrak reservation # when they ended the PNR but would not allow the merge. I was under the understanding that the GDS were not required to enter this info yet. Is Sabre an exception or did something change?

Thanks,

Re: FW: Passenger Information Requirements for Border Crossing

Could you please advise on the final Amtrak decision whether the passenger ID and gender info will be made mandatory and the error will be displayed once we will try to issue a ticket? There should no error be displayed in the system even if the passenger info is missing in the PNR, and the info should be collected by Amtrak in different way directly from the customer, maybe at the check in.

Please advise.

Hello

We understand and appreciate your dilemma, however it is no different to that of the airlines and the airlines have accepted that it is their responsibility alone. The airlines are providing numerous means for the data to be provided in advance, but they are not mandating it.
We have one subscriber that has checked the Federal Register and is quoting "chapter and verse" that it is not mandated for the subscriber to provide the data. The subscriber wishes to make contact with Amtrak over this matter. Would you please advise a contact that I can pass to this subscriber.

Thx and brgds,

RE: Passenger Information Requirements for Border Crossing

Hello

As far as I know, Worldspan has not been mandated to get this data, but Amtrak has been required to provide this data. Currently we do not allow ticketing if DOB information is not supplied on cross border trains. The CBP has stated that we must also collect Passenger Identification on Cross border trains. If we do not collect the requested data, the CBP will start to fine us on the non-collection, thus Amtrak will be requiring both DOB and Passenger Identification prior to ticketing.

I'm not sure how to communicate that to your subscribers, but at some point in the near future, Amtrak will activate the enforcement.

As for the document, let me check with my technician, and we will supply a finalized document.

I hope this is clear,

---

Subject: Re: Passenger Information Requirements for Border Crossing
The doc you have provided for the provision of APIs data is a draft document. Has this been finalised? I wished to be sure that we are working with defined requirements.

The Amtrak document suggests that the U.S. CBP has mandated that Worldspan and its subscribers must provide the API information. I have been asked to point out that CBP have not mandated any GDS or Travel Agency for the provision of this data and that this should be clear in any notices.

Your specification document appears to mandate the requirement of the API data at time of ticketing, that is, if it is not present at time of ticket request an error will be returned. A number of subscribers have raised this issue as it is at variance to their interpretation of the API requirement and their policy decision of non-provision. How should we respond to these enquiries? Can we redirect them to you?

---

Hello

Please find attached the changes being proposed for the collection of additional identification data for the Border Crossing PNRS in Arrow. These changes are being mandated by the US Border Inspection Agencies. We have targeted the requirements to be of least impact to you, and have a targeted date of the 1st October. Please review and let me know which approach for passing data that you will employ.

Thanks,

---

Hi [redacted],

I have loaded today some preliminary changes in our test system to process the SSR DOCS. They will be available today all day for you to test at your convenience.

For now, our test system will only process valid SSR DOCS. If an invalid SSR DOCS is received it will be just ignored and you won't receive the expected error.

Once you have some SSR DOCS processed, please let us know the PNR numbers so we can take a look at them here.

Thanks.

Subject: SSRDOCS

Here are a couple of rlocs for bookings I made which contain the SSRDOCS format.

All of these returned the SSR OTHS 1A KK1 PNR REQUIRES DOB INFORMATION PRIOR TO TICKETING error. Please let me know if there's a problem.

Regards,

Subject: GDS APIS: Need loadset in TPFT
Hi (b)(6)

Page 278
Border Crossing.txt

I need to load a loadset in TPFT so that GDS are able to test some changes regarding
APIS (Passenger information in Border-crossing PNRs).

Since those changes are still in coding phase and will need further modifications, I
am not going to the normal test-life cycle yet (when coding is complete and
preliminary testing is ok I will), but I do require the GDSs to test what it has
been done so far.

I will need to active/de-active the loadset as changes are added and corrections are
made to those programs. Those changes shouldn’t have any impact to any other users.
Since GDSs only have Mon thru Wed as window for testing these changes, I would like
start doing it as soon as possible.

Please let me know if it is ok to load and active this loadset in TPFT and if you
have any questions or concerns.

Loadset: DSN-GRSS.OLD.V0JS (VOJSAPIS)
CONTAINS THESE PROGRAMS (So far, I may add more)
PDF3E0 TAAEE0 TID3E0 TIG2E0
TIG3E0 TIG5E0

Thanks

Subject: Amtrak - Passenger Information Requirements for Border Crossing

Hi (b)(6),

I am just back from vacation and I am trying to get the latest update
regarding all projects I have been working on before I went for vacation.

Could you please advise what is the final release date of the Passenger ID
and gender information; of the "smoking" indicator, and the 2 character
name.
Are these three pieces of functionality going to be released at the same
time?

Thank you.

Product Specialist Non - Air
Is this an issue with a travel agent who is reluctant to obtain and submit the information through their GDS? Or is this a situation in which the GDS is reluctant to code and implement the changes needed to support our PUD initiative?

I promised that I would speak to this Worldspan subscriber about the collection of passenger data for cross-border travel. The subscriber in question is challenging our requirement that we have this information before we allow ticketing. I will be happy to speak with them, but I would like to get your input on how I might best respond in a meaningful way. Any suggestions?

FYI

Hello (b)(6)

We understand and appreciate your dilemma, however it is no different to that of the airlines and the airlines have accepted that it is their responsibility alone. The airlines are providing numerous means for the data to be provided in advance, but they are not mandating it.

We have one subscriber that has checked the Federal Register and is quoting "chapter and verse" that it is not mandated for the subscriber to provide the data. The subscriber wishes to make contact with Amtrak over this matter. Would you please advise a contact that I can pass to this subscriber.

The and brgds,

06/10/2005 23:34
Hello,

As far as I know, Worldspan has not been mandated to get this data, but Amtrak has been to supply this data. Currently we do not allow ticketing if DOB information is not supplied on cross border trains. The CBP has stated that we must also collect Passenger Identification on Cross border trains. If we do not collect the requested data, the CBP will start to fine us on the non-collection, thus Amtrak will be requiring both DOB and Passenger Identification prior to ticketing.

I'm not sure how to communicate that to your subscribers, but at some point in the near future, Amtrak will activate the enforcement.

As for the document, Let me check with my technician, and we will supply a finalized document.

I hope this is clear,

The doc you have provided for the provision of APIS data is a draft document, has this been finalised? I wished to be sure that we are working with defined requirements.

The Amtrak document suggests that the U.S. CBP has mandated that Worldspan and its subscribers must provide the API information. I have been asked to point out that CBP have not mandated any GDS or Travel Agency for the provision of this data and that this should be clear in any notices.

Your specification document appears to mandate the requirement of the API data at time of ticketing, that is, if it is not present at time of ticket request an error will be returned. A number of subscribers have raised this issue as it is at variance to their interpretation of the API requirement and their policy decision of non-provision. How should we respond to these enquiries? Can we redirect them to you?

Brads,

Hello

Please find attached the changes being proposed for the collection of additional identification data for the Border Crossing PNRs in Arrow. These changes are being mandated by the US Border-Inspection Agencies. We have targeted the requirements to be of least impact to you, and have a targeted date of the 1st October. Please review and let me know which approach for passing data that you will employ.

Thanks,

I understand that there were some problems. I’ll get the details and get back to you by Wednesday.

Has this implemented? We are approaching the point of testing.

Please let me know,

Hello (b)(9)

Yes we have the same list - but customs gave us a different list - I believe what we need to do our side is map your codes to ours - I listed that below - what do you believe AD, A, C, I, IP, P, F mean and then we'll see about mapping them:

AIRIMP Code
Amtrak Code
Description

RA
US Resident Alien Card

PR
LPR (Legal Permanent Resident) Card
P
PP
Passport
IP
RE
Re-entry Permit

RT
Refugee Travel Document

NC
Naturalization Certificate

BC
Birth Certificate (requires photo id)

MO
Military Orders (requires photo id)

Hello

When would you like to activate the enforcement of Passenger information for SABRE. The original plan was for this Thursday, but as I haven't heard from you, would you prefer the following Tuesday?

Please let me know as soon as possible,
Hi

Due to the time constraint, we were able to provide limited support covering the specific scenarios requested below. No automation test support was conducted.

Scenario A: OEE307/DTHFIE

Scenario B:
PNRS completed for to be processed for Infant scenario:

OEE323/DTLUDL
OEE328/DTLEWW
OEE332/DTMFQM

Scenario C: Non Border Train with PID Field

Result: PID accepted and ticket issued

OEE327/LDYCMO

Scenario D: 1 character first / surname field

Input: -T/A

Result: $FORMAT$

Subject: Amtrak regression and end to end testing for Tuesday September 20, 2005.

Good morning,

PLEASE BOOK PNRS WITH THE FOLLOWING DATES: 20SEP-10OCT
The Test System should be ready for testing around 10:00am ET

1. SABRE ONLY
   A. Please create PNR's with Border Crossing segments. Ensure there are minimum of two characters for the first and last names. Add SDOB(date of birth)and a S5PID field. Modify / delete SDOB and S5PID fields. Add new SDOB / S5PID field and ticket PNR's. Forward PNR numbers.

   B. Create PNR's with Border Crossing segments. Ensure there are minimum of two characters for the first and last names. Email me(sweetc@amtrak.com) the PNR numbers. I will add an infant to the PNR's and email back. Add
5DOB and 5PID field for infant and forward PNR's to the test group.

C. Create PNR's without Border Crossing segments and ensure there are a minimum of two characters in the first and last names. Add a 5DOB field (not required in non-border crossing PNR's). Please ticket the PNR's and forward the PNR numbers.

D. Create PNR's with a 1 character first name and 1 character last name. You should be unable to enter 1 character name fields.

2. WORLDSPAN ONLY

A. Please create and ticket several reservations that contain PTA(Prepaid Ticket Advice) numbers. Forward the PNR number to the test group. Use the attached regression script for PTA numbers.

3. Do full ARROW regression testing based on the attached standard script.

<<Regression User testing 092005.doc>>

Please send and myself the results. Thanks for your cooperation.
